

It's been a busy term for Careers and Guidance at Conisborough College. We kicked off the year with the launch of the Envision Programme for the second Year 10 cohort. Sixteen students attended the launch to start the 13-week inter-school competition across Lewisham.

## **URBAN SYNERGY**

Also this term, Year 9 students attended an inspirational Urban Synergy Role Model in STEM Seminar at Refinitiv, in Canary Wharf. 70 students had the privilege of meeting a wide range of professionals, including Engineers, Project Managers, Lawyers, a CEO and many more. Students learned about different careers and job roles; and received invaluable advice from a panel of successful professionals on steps they can use in their daily practice and in school to help them achieve their academic or career goals. Students left feeling uplifted and motivated to work hard to pursue their career dream.

"I want to go into project management because it sounds so interesting working on many different projects at one time. I now know what I need to do to achieve this".

We have some exciting plans going forward that we are excited to share with you, so look out for more amazing careers related stories in our next issue.

**Mrs L Pacquette** - *Careers Leader*
